

2017.0.2.9650 2018-05-04

Error rectification

- By stretching infill-sections the new length did not be saved. Therefore editing or dimensioning the stretched sections the wrong length was used. This bug has been fixed.

Improvements

- Execution on AutoCAD / Architecture / Advance Steel / Mechanical 2019 enabled.

2017.0.1.8976 2018-02-12

Error rectification

- Various inaccuracies in the program texts in languages other than German have been corrected.
- A problem occurred plotting shaded 3D-sheetmetals, made with "sheet .processing modul", has been rectified.
- Fixed text errors when changing format of labels created using "labeling tags" command.
- In some unusual cases drawings weren't able to save anymore. They will now be saveable again.
- If you have modified inserted ATHENA infills with AutoCAD "stretch" command and then you want to edit them by double-clicking, then the total length has been reset to the original dimension.

Improvements

- English, French, Spanish, Italian, Dutch, Polish, Czech, Russian and Chinese translations have been complemented.
- The setup routine now allows installation on Autodesk vertical product "Advance Steel".
- Various improvements to the LogiKal interface.
